

ANIKET GUDGAL

Java Full Stack Developer (Java | Spring Boot | React.js)

Pune, Maharashtra | +91 7057112026 | aniketgudgal5867@gmail.com | linkedin.com/in/Aniketgudgal | github.com/Aniketgudgal

PROFESSIONAL SUMMARY

Java Full Stack Developer with 1.3+ years of professional experience and hands-on project experience delivering full-stack applications using Java, Spring Boot, Spring Security, JWT, REST APIs, Hibernate/JPA, React.js, and MySQL/PostgreSQL. Experienced in designing secure backend services with role-based authentication, containerizing applications with Docker, and deploying to AWS (EC2, S3, CloudWatch). Comfortable building responsive React.js frontends integrated with REST APIs, and exploring event-driven patterns with Kafka and caching with Redis. Solid foundation in OOP, MVC architecture, database design, and debugging. Currently serving notice period and looking for a full-time Java + React Full Stack Developer role.

TECHNICAL SKILLS

Languages: Java 8, JavaScript, SQL, Python (basic)

Backend: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, JWT, Hibernate/JPA, REST APIs, Servlets, JSP, JDBC

Frontend: React.js, HTML5, CSS3, JavaScript, Bootstrap, Responsive UI

Database: MySQL, PostgreSQL, SQL (Joins, Subqueries, CRUD, query optimization)

Cloud & DevOps: AWS (EC2, S3, CloudWatch), Docker, GitHub Actions (CI/CD basics)

Messaging & Caching: Apache Kafka (event-driven basics), Redis (caching basics)

Tools & Version Control: Git, GitHub, Maven, Postman, Swagger/OpenAPI, Eclipse, VS Code

Practices: MVC Architecture, Agile/Scrum basics, Unit Testing fundamentals, Debugging

PROFESSIONAL EXPERIENCE

Java Full Stack Developer — G-Soft Solutions, Pune

Jul 2025 – Present

- Developed and maintained web application modules using Core Java, Servlets, JSP, and JDBC, following MVC architecture to separate presentation, business logic, and data layers.
- Built a Login & Registration System enabling secure user registration, authentication, and session management, with backend CRUD operations performed via JDBC against a MySQL database.
- Implemented client-side and server-side form validation and structured error handling to improve application reliability and data integrity.
- Developed responsive UI screens using HTML, CSS, and Bootstrap, and integrated them with backend Java components.
- Wrote and optimized SQL queries for data retrieval, insertion, updates, and reporting, working directly with MySQL.
- Applied Core Java and Spring fundamentals (Spring Boot, Hibernate/JPA, REST API concepts) in ongoing feature development, aligning with the team's Spring-based projects.
- Used Git for source control and collaborated with team members during code reviews and debugging sessions.

PROJECTS

Digital Banking & Customer Account Management System

Tech Stack: Java, Spring Boot, Spring Security, JWT, React.js, MySQL/PostgreSQL, REST APIs, Docker, AWS (EC2, S3, CloudWatch)

- Built a secure digital banking application for customer registration, authentication, account management, and beneficiary operations using a Controller-Service-Repository architecture with DTO-based request/response handling.
- Implemented JWT-based authentication and role-based authorization with Spring Security; designed relational schemas for customers, accounts, beneficiaries, and transactions using JPA/Hibernate.
- Developed React.js screens (login, dashboard, account details, transaction history, profile) integrated with backend REST APIs, including validation, pagination, and centralized exception handling.
- Containerized the application with Docker and deployed on AWS EC2/S3 with CloudWatch-based logging.

Loan Origination & Credit Decisioning Platform

Tech Stack: Java, Spring Boot, Spring Security, REST APIs, PostgreSQL/MySQL, React.js, Docker, AWS, GitHub Actions

- Built a loan processing platform covering customer onboarding, application creation, document submission, eligibility evaluation, and approval-status tracking.
- Implemented configurable business rules for eligibility/credit decisioning and role-based access for customers, loan officers, and administrators using Spring Security and JWT.
- Integrated AWS S3 for secure document storage and automated build/deploy using Git, GitHub Actions, Maven, and Docker.

Enterprise Payment & Transaction Processing Platform

Tech Stack: Java, Spring Boot, REST APIs, PostgreSQL, Kafka, Redis, React.js, Docker, AWS

- Developed transaction-processing services for payment initiation, validation, status tracking, and reconciliation using Spring Boot and JPA with transactional consistency.
- Applied Kafka-based asynchronous messaging for transaction events and Redis caching for frequently accessed reference data to reduce database load.
- Implemented authentication, centralized exception handling, and CloudWatch-based monitoring; containerized and deployed services with Docker on AWS.

Alumni Management System

Jun 2024 – Jun 2025

- Built a web-based portal for managing alumni records for 2,000+ users, including data cleanup and profile updates, using Django and Python with a responsive UI.
- Digitized alumni data management workflows, significantly reducing manual record-handling effort.

Other Projects: Line Following Robot (IR sensors + PID control, autonomous path-following) · Simple Clap Switch (sound-sensitive relay circuit)

INTERNSHIP

Web Development & Designing Intern — Oasis Infobyte

Mar 2024 – Apr 2024

- Built a functional calculator application, a responsive fitness website landing page, and a real-time temperature converter tool using HTML, CSS, and JavaScript.

EDUCATION

B.E., Electronics & Telecommunication Engineering

Dec 2021 – Jun 2025

Dr. Vithalrao Vikhe Patil College of Engineering, Ahilyanagar | CGPA: 7.66

HSC

Jun 2020 – Jun 2021

Dnyansarita Vidyalaya, Wadgaon Gupta, Ahilyanagar | 63.17%

ACHIEVEMENTS & ACTIVITIES

- Secured All India Rank 1 in Smart India Hackathon (SIH) 2023 for innovative problem-solving.
- Achieved 3rd rank in a college-level poster competition for innovative solution development.
- Completed Government of India Innovation, Design & Entrepreneurship (IDE) bootcamps at Nagpur and Visakhapatnam.
- Participated in Startup Olympiad 2025 (SPPU) and mentored shortlisted teams under the Startup & Innovation Cell.

ADDITIONAL INFORMATION

- Available to join within 15 days.
- Languages: English, Marathi, Hindi (Proficient — Read, Write, Speak).
- LeetCode: leetcode.com/u/aniket5867/
